

Dear Colleagues,

On behalf of the ISSMGE TC304 (Engineering Practice of Risk Assessment and Management), we are pleased to announce the TC304 Student Contest Session as an associated event to ESREL 2019 (www.esrel.org). The Student Contest Session will take place as a pre-conference activity on Sept 22, which is the day of the conference reception.

The Call for Participation is attached in this email. Students are asked to solve a real underground stratification problem (attached) using the statistical/probabilistic/machine learning methods of their choice.

An ISSMGE TC304 Student Contest Award will be given to the winner. Depending on the number of participants, several encouragement awards may be given as well.

If you are keen to participate this Student Contest, please fill out the participation form (attached) and email to g.vessia@unich.it or Wojciech.Pula@pwr.edu.pl. For inquiry, please also write to the same email.

Important dates

February 28 2019: Submission of participation form

August 31 2019: Submission of full length paper

September 22 2019: TC304 Student Contest

We look forward to meeting you in Hannover!

The TC304 Chair & The Session Conveners
