CHALLENGES *and* INNOVATIONS
in GEOMECHANICS

TORINO • ITALY
30 August • 2 September
2022

Save
the date

The aim of the conference is to give an up-to-date picture of the broad research field of computational geomechanics. Contributions from experts around the world will cover a wide range of research topics in geomechanics. The conference program will include plenary lectures, mini-symposia, selected oral and poster presentations.

SHORT COURSES

For more information and registration visit: www.iacmag2022.org

GRENOBLE • 29-30 August, 2022

Multiscale numerical modelling of geomaterials: inferring macro behaviour from micromechanisms

Local Organizers: Alice Di Donna, Angela Casarella and Cino Viggiani - U.G.A., Grenoble

MILANO • 30 August, 2022

Multi-physics processes in geomechanics by coupled numerical analysis

Local Organizer: Donatella Sterpi - Politecnico di Milano

TORINO • 30 August, 2022

Energy tunnels for a self-sustainable metro: feedback from the design of the thermal activation of Turin metro line 2

Local Organizer: Marco Barla, Alessandra Insana - Politecnico di Torino

REGISTRATION

Registration is now open

Early registration fee:

(until July 1, 2022)

- Senior € 450,00
- Student € 250,00

Standard registration fee:

(after July 1, 2022)

- Senior € 500,00
- Student € 275,00

On-site registration fee:

- Senior € 550,00
- Student € 300,00

- All fees include Italian VAT 22%.
- Student registrants will be required to show evidence of their student status by emailing their student certificate to iacmagstudent@symposium.it.
- On-site registrations will be subject to availability.
