TORINO | February 14-16 2028

12° International Symposium of Geotechnical Aspects of Underground Construction in Soft Ground

CALL FOR ABSTRACT

topics

- Site characterisation, geotechnical modelling and design reliability
- Sensing techniques for field monitoring and lab testing
- Underground excavation in complex and heterogeneous ground
- Interaction with existing infrastructure and heritage structures
- Low-carbon and circular solutions for underground construction
- Digital twins, automation and machine learning in tunnelling and underground engineering
- Maintenance and resilience of underground constructions
- Case histories

key dates

OCT 2026: *call for abstracts*

DEC 2026: *abstracts submission deadline*

JAN 2027: *acceptance of abstracts*

APR 2027: *paper submission*

JUN 2027: *paper review notification*

AUG 2027: *final paper submission*

SEP 2027: *final acceptance*

NOV 2028: *final programme (paper selection)*

FEB 2028: *conference*
